# Grampian Continental lets Tidy Green Clean help them with clean getaways!

## Our client

Grampian Continental is a leading road transport logistics business, based in Aberdeen and with offices in Great Yarmouth, and The Netherlands, with partners across Europe and into North Africa. They have a modern fleet of trucks and trailers and work to ISO 9001, ISO 14001 and ISO 45001, like Tidy Green Clean.

In 2020, TGC Aberdeenshire South was awarded the contract for office cleaning at their new premises in Altens that had been purpose built to include accommodation for drivers who need somewhere to stay between jobs.

## Their challenge

The previous offices had essentially been portacabins and the move to new premises created a requirement for a fresh approach to the cleaning of the offices. They see heavy footfall every day from customers and drivers in and out of the offices, often arriving with dirty boots, which potentially could create a dirty and unhygienic working environment for the team based there. At the same time, the new accommodation rooms need to be turned around regularly for different drivers making use of the company's overnight facilities.

## Our solution

Tidy Green Clean Aberdeen South's Regional Director, Grant Peterkin created a cleaning schedule to meet Grampian Continental's needs. His team of two clean the offices five days a week and they also machine scrub the office floors to ensure the offices remain healthy and hygienic throughout the week. They also provide a full cleaning service for the accommodation provision to make sure drivers and other Grampian Continental employees who overnight there, are comfortable and rested while they stay.

As a matter of course, Tidy Green Clean provides full HSEQ documents, ISO accreditation certification, RAMS, Method Statements and other process and technical data, which creates a significant sense of confidence and trust in clients when they are considering awarding commercial cleaning contracts.

## The outcome

Neil Bremner is the Finance Director at Grampian Continental. He said,

"The considerable diligence, care, and attention Grant's team provides us at our HQ here in Aberdeen is outstanding. We seek out commercial partners who share our values of ethical behaviour, respect for our customers, professional conduct, and family culture. We could not have asked more from Tidy Green Clean and I would have no hesitation in recommending them to other businesses who want a commercial cleaning service that makes it an absolute pleasure to come to work."
